# OMRI Products List 2022

OMRI's Mission is to support the growth and trust of the global organic community through expert, independent and transparent verification of input materials, and through education and technical assistance.

## OMRI Board of Directors

Chair: Matt Landi; Vice-Chair: Deirdre Birmingham, Ph.D.; Secretary: Roxeanne Beavers; Treasurer: Darren MacFarlane  
 Members: Nicole Denhe, Emily Gantz, Rick Geise, Becky Gretebeck, Chris Grigsby, Hannah Smith-Brubaker, Leslie Touzeau, Gwendolyn Wyard

## OMRI Advisory Council Members

The Advisory Council provides independent, professional expertise to the OMRI Review Program.  
 Brian Baker, Ph.D.; Will Brinton, Ph.D.; Emily Brown Rosen; Kate Burroughs; Tane Datta; Jackie DeMinter; John Fagan, Ph.D.; David Gould; Steven Harper; Jacqueline P. Jacob, Ph.D.; Mary O. Mulry, Ph.D.; William Quarles, Ph.D.; Eric Sideman, Ph.D.; Zea Sonnabend; Jessica Walden; Ann Wells, DVM

## External Review Panel Members Crops, Livestock, Processing & Canada

OMRI External Review Panels, and an Internal Review Panel of experienced staff members, determine whether products are allowed, allowed with restrictions, or prohibited.  
 Annie Berical; Jackie DeMinter; Javier Fernández-Salvador; Andy Hupp; Guy Jodarski, DVM; Garth Kahl; Cheryl Laxton; Garry Lean; Luis Lopez; Juan Ortega; Sarah Reed; Mabell Rivas; Adam Seitz; Zea Sonnabend; Alyssa Stoneman; Tom Tomas, Ph.D.; Craig Weakley; Ann Wells, DVM

## OMRI Staff

Executive Director/CEO: Peggy Miaris

# Introduction

**OMRI's mission is to support the growth and trust of the global organic community through expert, independent and transparent verification of input materials, and through education and technical assistance.**

The Organic Materials Review Institute (OMRI) is an international nonprofit organization founded in 1997 to support the organic community. OMRI is accredited by the United States Department of Agriculture (USDA) to review input products for organic use under International Organization for Standardization (ISO) 17065. Suppliers of

The OMRI Listed® seal is the organization's registered trademark.

products intended for use in organic agricultural production or food processing and handling may submit applications to OMRI for review.

OMRI uses the USDA National Organic Program (NOP) regulations (7 CFR part 205), the Canada Organic Regime (COR) standards (CAN/CGSB-32.311 and CAN/CGSB-32.310) and the Mexico Organic Products Law (LPO) (including the Regulation of the Organic Products Law and the Guidelines for the Organic Operation of the Agricultural and Livestock Activities) to verify the compliance of products intended for organic production and processing. OMRI also maintains standards specifically for the consideration of inputs for organic use under the organic regulations.

OMRI safeguards public trust in the organic industry through a transparent and consistent decision-making process. Also, OMRI is committed to providing service that is accurate and professional, in a manner that is efficient and well run. OMRI offers an array of information services for the organic community. These include subscriptions for organic professionals, with current information about standards, materials, and technical issues related to material review. OMRI also provides instructive training for industry groups, contract research work for organic stakeholders, and expert technical assistance with materials decisions for certifiers.

## **About the OMRI Products List®**

This directory includes all products that OMRI has determined are allowed for use in organic production or processing and handling under USDA National Organic Program regulations. Only those products that have passed OMRI's rigorous review are included in the *OMRI Products*

*List* and can display the OMRI Listed® seal and/or approved wording. This printed *OMRI Products List* is current as of December 6, 2021. OMRI regularly removes and adds products. For an updated list of allowed products, visit the online product search or *OMRI Products List* PDF download at OMRI.org.

Because participation in the OMRI Review Program is voluntary, a product's absence from the *OMRI Products List* does not imply its failure to comply with the relevant organic standards.

The *OMRI Generic Materials List*® contains information about substances in general, while the *OMRI Products List* contains formulated branded products. Users should be aware that material entries from the *OMRI Generic Materials List* are used as categories for products in the *OMRI Products List*. However, formulated products may contain additional ingredients.

For users following the Canada Organic Regime standards and/or the Mexico Organic Products Law, OMRI offers the *OMRI Canada Products List*® and *OMRI Mexico Products List*®, available for free download from OMRI.org.

## **How products are reviewed**

As a nonprofit organization, OMRI offers an independent third-party review of products that balances the need for confidentiality in reviewing proprietary formulations with the necessity to ensure that products comply with the standards. OMRI reviews applications from input suppliers for products to be used in crop and livestock production and processing.

To assess compliance with the applicable standards, product applications must contain all required information regarding product ingredients, formulations and manufacturing processes. OMRI operates under a rigorous confidentiality policy to guard against disclosure of proprietary product information to unauthorized individuals. OMRI staff reviews the application and makes a recommendation to the appropriate OMRI Review Panel to make the final product decision. All products are reviewed according to OMRI's published policies and standards. Products evaluated and found not compliant

for use in organic production are designated Prohibited and are not included in the *OMRI Products List*. OMRI regularly provides subscribing certifiers with a list of prohibited products. Organic certifiers may contact OMRI for more information about the benefits of subscribing.

### How to use the *OMRI Products List*

The *OMRI Products List* is divided into three sections that sort product listings by category, company name and product name. Each of these sections is subdivided into Crops, Livestock and Processing. In the Categories section, products are listed on the basis of their principal or active purpose or ingredient (e.g., Manure, Pyrethrum, or Dust Suppressants), and are grouped according to use, such as “Fertilizers and Soil Amendments” or “Pest, Weed, and Disease Controls.”

### Product use restrictions

Some products included in the *OMRI Products List* are allowed with restrictions. OMRI developed the use restrictions to tell users about important qualifications for applying the product in a certified organic system. All use restrictions are based on the USDA National Organic Program regulations. In the case where a product has a use restriction, the restriction is given in the Categories section. Further regulatory information specific to the class and category can be found in the *OMRI Generic Materials List* or through the OMRI website search.

Additional qualifications concerning the use of some products included in the *OMRI Products List* are found in footnotes at the bottom of each even-numbered page.

### Guide to footnote symbols

OMRI uses footnote symbols to communicate important information about individual products in the *OMRI Products List*. The following list explains the meaning of each footnote, and users can also refer to the legends in the bottom left-hand corner of each even-numbered page.

◆ **This product is allowed with restrictions. See the Categories section for use restrictions.**

The Categories section includes the applicable restriction(s) for each product.

■ **This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.**

The USDA National Organic Program requires that all liquid fertilizers with a nutrient value or label claim above 3% meet special requirements for use in organic production. These requirements include two annual inspections, and OMRI conducts the required inspections for all products that fall into this >3% group. This footnote confirms that OMRI has taken the appropriate verification steps.

### Caution Statements

The USDA organic regulations stipulate that producers shall take steps to prevent the contamination of crops, soil and water. OMRI uses caution statements to communicate levels of heavy metals and pathogenic organisms in order to provide users with the appropriate information to address potential contamination of crops, soil and water.

- 1 The arsenic level of this product exceeds 10 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 2 The arsenic level of this product exceeds 20 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 3 The lead level of this product exceeds 10 ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.
- 4 The lead level of this product exceeds 90 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 5 The lead level of this product exceeds 180 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 6 The cadmium level of this product exceeds 20 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 7 The cadmium level of this product exceeds 40 ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- 8 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic

farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

- 9 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.
- 10 This ingredient or processing aid is not certified organic. The operation supplying this input material may be exempt from certification under §205.101. Agricultural ingredients in this product shall not be labeled as organic when used in further processed products unless the ingredient or processing aid is certified by a USDA accredited certifier.

### How current is the OMRI Products List?

OMRI regularly adds and removes products from the *OMRI Products List*. An OMRI subscription helps users stay up-to-date concerning changes. Subscribers receive the OMRI Products List and quarterly supplements, the *Materials Review*<sup>®</sup> newsletter with in-depth coverage of topics related to materials, and the current *OMRI Generic Materials List*. Regular updates to the *OMRI Products List* are made to the online version at OMRI.org. Users may periodically check the online version of the *OMRI Products List* to ensure that they have the most up-to-date information regarding OMRI Listed products. No password or login is needed to access this free service on the website.

### Compliant use of OMRI Listed products

USDA-accredited certifying agents may choose to accept OMRI listing as proof of compliance in accordance with organizational policies. The final decision on the acceptability of a product for a specific use and operation is the responsibility of the accredited certifying agent. Certified organic operators should always check with their accredited certifying agent before using a new product in an organic operation.

OMRI does not provide any guarantee or warranty, expressed or implied, for any products included on the OMRI Products List. It is the user's responsibility to properly use a product according to applicable federal and state laws and regulations.

OMRI listing assures the suitability of a product for certified organic production, handling or processing under the following conditions:

- The product must be included in the operator's certifier-approved Organic System Plan.
- Products must be used according to the use restriction(s) described in the Categories section.
- Both the product and company names on the label must match the information in the OMRI Products List.
- Users must apply the product according to the instructions or purpose on the label that corresponds with the OMRI Listed class and category.

Also, users of OMRI Listed products should follow these practices:

- Guard against the possibility of environmental contamination and negative ecological impacts.
- Handle products with care for the safety of the workers involved. Contact the manufacturer about a product's efficacy, health and environmental effects.
- Contact appropriate governing officials to determine which laws and regulations apply to specific products.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

**1** The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

**8** This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

5 The lead level of this product exceeds 180ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

9 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

## Fertilizers, Blended with micronutrients

*Must not be used as an herbicide, defoliant or desiccant. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent.*

### **Fertilizers, Blended with sodium nitrate**

*This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.*

### Iron Products

*Must not be used as an herbicide, defoliant or desiccant. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent.*

- Allister Grinamin FORTE Fertilizante Orgánico Líquido (Allister de México S.A. de C.V.) *alm-6198* – This product also has the use restriction(s) for *Boron Products; Copper Products; Manganese Products; Molybdenum Products; Zinc Products.*
- axe Fe Quelato orgánico de Hierro (NUTRINETS Vegetales S.A. de C.V.) *nvs-10000*
- BioFlora® Iron 0.05-0-0.2 (BioFlora) *bm-0458*

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

3 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

### Microbial Products, with manure

*May only be (i) applied to land used for a crop not intended for human consumption; (ii) incorporated into the soil not less than 120 days prior to the harvest of a product whose edible portion has direct contact with the soil surface or soil particles; or (iii) incorporated into the soil not less than 90 days prior to the harvest of a product whose edible portion does not have direct contact with the soil surface or soil particles.*

- Accomplish LM (Loveland Products, Inc.) *lpi-10728*
- New Life Agricultural (Microbial Solutions LLC) *mcs-8729*
- Soil Builder (Agricen) *agq-16396*

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

### Micronutrients

*Must not be used as an herbicide, defoliant or desiccant. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent.*

- AGNITION Generate for Organic Use (Ralco Nutrition, Inc.) *rni-14280*

 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

### Acid Activators for Chlorine Dioxide

*Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.601(a)(2)(ii). Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.*

## Chlorine Dioxide

*Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.*

<sup>2</sup> The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

<sup>3</sup> This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

### Citrus Products

*For use as a pest lure, repellent, or as part of a trap, or as a disease control. May be used for other pesticidal purposes if the requirements of 205.206(e) are met, which requires the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.*

AgroCIT Fungicida-Bactericida Orgánico (Agrobiosol de Mexico SA de CV) arm-13279

Fractal Extracto de cítrico Bactericida/ Solución Acuosa (Berni Labs. S. de R.L. Microindustrial) bls-3973

### Copper Sulfate

*For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which requires the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.*

### Soap, Ammonium

May only be used if the requirements of 205.206(e) are met, which requires the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. When used as an animal repellent, may only be used as a large animal repellent and substance must not contact soil or edible portion of crop.

- AXXE® Broad Spectrum Herbicide (BioSafe Systems) bss-2930

### Sodium Carbonate Peroxyhydrate

Federal law restricts the use of this substance in food crop production to approved food uses identified on the product label. For use as an algicide. May only be used if the requirements of 205.206(e) are met, which requires the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

## Management Tools and Production Aids

### Acid Activators for Chlorine Dioxide

*Must only be used for the generation of  
chlorine dioxide. Use of resulting chlorine  
dioxide must comply with 205.603(a)(10)  
(ii). Chlorine products may be used up to  
maximum labeled rates for disinfecting and  
sanitizing equipment or tools (including  
dairy pipelines and tanks). Residual chlorine  
levels in the water in direct contact with food  
products or animals shall not exceed the  
maximum residual disinfectant limit under  
the Safe Drinking Water Act (4 mg/L (4ppm)  
expressed as chlorine, 0.8 mg/L (0.8 ppm)  
expressed as chlorine dioxide). May be used  
up to maximum labeled rates for sanitizing  
equipment or tools. Label instructions should  
be followed regarding requirements for  
rinsing or not rinsing prior to the equipment's  
next use.*

- Tosca Reusable Plastic Container (Tosca Services, LLC) *gpr-0732*

## Pest Controls

### Boric Acid

*May be used as an insecticide for structural pest control provided there is no direct contact with organic food or crops.*

- Harris Famous Roach Tablets (P.F. Harris Manufacturing Company, LLC) *pfh-6313*
- Niban Granular Bait (Nisus Corporation) *nis-13497*

### Botanical Pesticides

*For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.*

- BX B-Xactive Plus Post-Harvest Food Preservant Emulsion (Jifkins S.A. de C.V.) *jfk-8848*
- Decco 050 EC Potato Sprout Inhibitor (Decco US Post-Harvest, Inc.) *elf-5669*
- Decco Decco 070 EC Potato Sprout Inhibitor (Decco US Post-Harvest, Inc.) *elf-4325*
- Decco Decco Aerosol 100 For Treatment of Potato in Storage (Decco US Post-Harvest, Inc.) *elf-4326*
- Eco Urban argemonina + berberina + ricinina + a-terthienil Insecticida / Extracto Acuoso (Ultraquimia Agrícola, S.A. de C.V.) *uqa-13220*
- KeyPlex Ecotrol IC-3 (KeyPlex) *key-6961*
- KeyPlex Ecotrol Plus Insecticide/Miticide Emulsifiable Concentrate (KeyPlex) *key-6921*
- KeyPlex EcoZAP Activator Mosquito Control Synergist/Activator Concentrate (KeyPlex) *key-7334*

### Diatomaceous Earth

*For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.*

- Diafil 610 Mechanical Insecticide (Imerys Filtration Minerals, Inc.) *cel-6617*
- Harris Bed Bug Killer Diatomaceous Earth (P.F. Harris Manufacturing Company, LLC) *pfh-7148*
- Harris Diatomaceous Earth Ant Killer (P.F. Harris Manufacturing Company, LLC) *pfh-15854*
- Harris Diatomaceous Earth Crawling Insect Killer (P.F. Harris Manufacturing Company, LLC) *pfh-11965*
- Insecto An Insecticide For Control of Grain Insects and House Insects (Natural Insecto Products) *nip-5064*
- Last Crawl Grain Insect DEstroyer Insecticide Powder (Absorbent Products Ltd.) *wic-4455*
- Last Crawl Insect DEstroyer Insecticide Powder Diatomaceous Earth (Absorbent Products Ltd.) *wic-5327*

 This ingredient or processing aid is not certified organic. The operation supplying this input material may be exempt from certification under §205.101. Agricultural ingredients in this product shall not be labeled as organic when used in further processed products unless the ingredient or processing aid is certified by a USDA accredited certifier.

### D-limonene

*For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.*

Orange Guard® Home Pest Control Water Based Formula (Orange Guard, Inc.) ogi-9023

### Inerts

*For use an adjuvant or inert ingredient in combination with permitted active ingredients for post-harvest pest control on raw agricultural commodities.*

Piccolyte AO Plus polyterpene oligomers (Pinova Inc.) pnv-10155

### Pheromones

Allure® MD Mating Disruption System for Stored Product Moths (BASF Corporation) bsf-1271

BASF Allure Stored Product Moth Kit (BASF Corporation) bsf-10468

Prescription Treatment Brand 4 Allure (BASF Corporation) bsf-2296

### Pseudomonas

*For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.*

Bio-Save® 10LP Biological Fungicide (JET Harvest Solutions) ecs-9482

### Pyrethrum

*For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.*

Evergreen Pyrethrum Dust (MGK) mgk-2214

MGK Evergreen Pyrethrum Concentrate (MGK) mgk-2170

### Repellents

First Saturday Lime Insect Repellent (First Saturday Lime) fss-15827

### Vitamin D<sub>3</sub>

*For use as a rodenticide. For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone.*

Bell Laboratories, Inc. Terad3 Ag Blox All-Weather Bait (Bell Laboratories, Inc.) bel-2479

◆ This product is allowed with restrictions. See the Categories section for use restrictions.  
■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

Products: A1 Organics Eco+® Organic Compost

♦ This product is allowed with restrictions. See the Categories section for use restrictions.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

9 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

2 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions.  
 See the Categories section for use restrictions.  
 9 This product contains more than 3 MPN/4g  
 Salmonella. Application of this product on  
 certified organic farms poses a significant risk  
 of contributing to contamination of crops, soil,  
 or water. Pathogen mitigation measures, such  
 as a 120/90 day pre-harvest application period  
 or composting as described at §205.203 of the  
 National Organic Program Regulations, must  
 be part of an organic system plan to reduce the  
 contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.  
 ■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

- ① The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.
- ② The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.
- ③ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

◆ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

3 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

◆ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

① The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

⑧ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.

② The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

③ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

Acid, Sustâne® Naturally Concentrated Compost 2-2-2

♦ This product is allowed with restrictions.  
 See the Categories section for use restrictions.  
 ■ This liquid fertilizer has been inspected and  
 approved for use in NOP organic production by  
 OMRI.

Ⓢ This product contains more than 1,000 MPN/g  
 fecal coliform. Application of this product on  
 certified organic farms poses a significant risk  
 of contributing to contamination of crops, soil,  
 or water. Pathogen mitigation measures, such  
 as a 120/90 day pre-harvest application period  
 or composting as described at §205.203 of the  
 National Organic Program Regulations, must  
 be part of an organic system plan to reduce the  
 contamination risk of this product.

## CROP PRODUCTS

### Class Codes

CF: Crop Fertilizers and Soil Amendments

CP: Crop Pest, Weed, and Disease Control

CT: Crop Management Tools and Production Aids

### "Sweet Leaf" Worm Castings

Kessler Worm Farms LLC  
Worm Castings (CF)

### μZEOFOL Complejo Mineral Para Fertiliriego ②

Zeolitech, S. de R.L. de C.V.  
Mined Minerals, unprocessed (CF)

### 0.5% MATRINE SL (K-MITE 0.5% MATRINE & PLANT OIL EW) ♦

Beijing Multigrass Formulation Co., Ltd  
Botanical Pesticides (CP)

### 1 LOVE POTTING SOIL

ROCK'N SOIL  
Potting Soil (CF)

### 100% premium quality coco coir

I & J LLC  
Transplant/Container Media (CF)

### 20 Mule Team Borax Granubor Sodium Borate 15% B Water soluble gradual release granulated borate ♦

U.S. Borax, Inc.  
Boron Products (CF)

### 20 Mule Team Borax Optibor TG Boric Acid Technical Granular Soluble borate for fluid fertilizers and nutrient sprays ♦

U.S. Borax, Inc.  
Boron Products (CF)

### 20 Mule Team Borax Solubor Sodium Borate 20.5% B Soluble borate for fluid fertilizers and nutrient sprays ♦

U.S. Borax, Inc.  
Boron Products (CF)

### 20 Mule Team™ Borax™ Fertibor® Sodium Borate 15% B Sodium borate for the manufacture of ammoniated, granulated, and suspension fertilizers ♦

U.S. Borax, Inc.  
Boron Products (CF)

### 3/8 x 1/16 Bulk Pumice

South Chemult Pumice Inc.  
Pumice (CF)

### 3:2:1 Planting Mix

Toscana Corporation  
Transplant/Container Media (CF)

### 3tier Technologies Carboxx Nature's Catalyst

3 Tier Technologies LLC  
Humic Acids – alkali extracted (CF)

### 3tier Technologies Huma-Balance XL Soil Conditioner

3 Tier Technologies LLC  
Microbial Products (CF)

### 3tier Technologies Huma-Boost

3 Tier Technologies LLC  
Humic Acids – alkali extracted (CF)

### 3tier Technologies LDM

3 Tier Technologies LLC  
Microbial Inoculants (CT)

### 3XM Compost

3xM Grinding and Compost LLC  
Compost, other (plant and animal materials) (CF)

### 440 Superior Spray Oil ♦

Wilbur-Ellis Company, LLC  
Oils, Horticultural (CP)

### 480 g/L Spinosad SC ♦

BAICAO BIOTECH CO., LTD  
Spinosad (CP)

### 5% Spinosad SC ♦

BAICAO BIOTECH CO., LTD  
Spinosad (CP)

### 5-4-3 with 9% Calcium

Kreher Enterprises LLC  
Manure, processed (CF)

### 5-7-2

Bull Enterprises, Inc.  
Fertilizers and Soil Amendments, Blended (CF)

### 5M Black Gold Manure Compost

EAST VALLEY AG CORPORATION  
Compost, other (plant and animal materials) (CF)

### 7.5% Spinosad DT ♦

BAICAO BIOTECH CO., LTD  
Biopesticides (CP)

### A.D.I.O.S. BIO-HERBICIDE (Org) Water Soluble Granules (WSG) ♦

HerbaNatur Inc.  
Sodium Chloride (CP)

### A1 Organics Eco+® Organic Compost

A1 Organics  
Compost, other (plant and animal materials) (CF)

### ab Brand Copper Sulfate Crystals ♦

Lonza  
Copper Sulfate (CP)

### Abiosa Biotecnología Aplicada BONASOL Fungicida Biológico Emulsión líquida EO ♦

Biotecnología en Materiales, S.A. de C.V.  
Microbial Products (CP)

### Abiosa Biotecnología Aplicada Folisan Fungicida Biológico Polvo Soluble SP ♦

Biotecnología en Materiales, S.A. de C.V.  
Microbial Pesticides (CP)

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

⑨ This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.  
■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

Ⓢ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

⑧ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

3 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

② The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

⑨ This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

◆ This product is allowed with restrictions. See the Categories section for use restrictions.  
■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

⑧ This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

♦ This product is allowed with restrictions. See the Categories section for use restrictions.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms cannot contribute to contamination of crops, soil, or water.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil or water.

8 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.
